### CASE STUDY of Project Jobtiviti App and Website Development

#### SUMMARY:

**Jobtiviti** is a social job seeking app that helps you to apply for jobs with your true potential. We combine traditional Job seeking information (like resume) and social activities to produce a comprehensive resume profile for jobseekers.

#### COMPLETE DETAIL OF JOBTIVITI:

##### A. Jobtiviti Admin Module:

1. **Company List** Admin received all the request of new Employer. Admin can View/edit/approve or reject the request.
2. **Job List** Admin received all the Jobs request from all the Employer. Admin can View/edit/approve or reject the Jobs request.
3. **Approve/Reject Job seeker** Admin received the request from all the jobseeker for every job. Admin can view/match/approve and reject their profile.
4. **Create announcement** This page is use to create the announcement which reflect to Job seeker when they open their profile on Mob app

A screenshot of the Jobtiviti mobile application interface. At the top, there is a logo consisting of two interlocking puzzle pieces (one blue, one pink) followed by the text 'Jobtiviti' in a bold, sans-serif font. Below the logo, the text 'Invite company to Jobtiviti' is displayed. The form contains several input fields, each with an icon to its left: a person icon for 'Name', an envelope icon for 'Email', a house icon for 'Company', a telephone icon for 'Phone number', a calendar icon for 'Event', and a document icon for 'Referrer'. At the bottom of the form is a blue button with the text 'Send Invitation' in white.

5. **Create agent** who verify the Jobs seeker (This page is use to create some agent who verify the jobseeker)
